

CURRICULUM VITAE

OF

Prof. (Dr.) K. GIRISH KUMAR

Dr.K.GIRISH KUMAR

Professor & Head

Department of Applied Chemistry

Cochin University of Science and Technology

Kochi 682 022

giri@cusat.ac.in

PERSONAL DETAILS

FULL NAME : **Dr. K. GIRISH KUMAR**

DESIGNATION : **Professor and Head** (Department of Applied Chemistry)
Director (Internal Quality Assurance Cell, CUSAT)

CONTACT NUMBER : +91-484-2575804 (office)
+91-484-2577813(res)
+91-9847363660 (Cell)

DATE OF BIRTH : 23-07-1962

E-mail : giri@cusat.ac.in, drkgirish@gmail.com

RESIDENCE : Kavyam
K K Lane
Toll Junction, Edappally
Kochi-682 024

EDUCATIONAL QUALIFICATION

SSLC	1st Class	Kerala State Board	1977
Pre-Degree	1st Class	Kerala University	1979
B.Sc (Chemistry)	1st Class	Kerala University	1982
M.Sc (Chemistry)	1st Class	Kerala University	1984
Ph.D (Chemistry)		Kerala University	1989

SERVICE HISTORY

- 1. Lecturer in Chemistry** :1989 - 1994
Gandhigram Rural University
Tamil Nadu
- 2. Lecturer (Senior Grade)** :1994 – 1998
Gandhigram Rural University
Tamil Nadu
- 3. Reader in Chemistry** :1998 – 1999
Gandhigram Rural University
Tamil Nadu
- 4. Reader in Analytical Chemistry** :1999 – 2006
Cochin University of Science and Technology
Cochin
- 5. Professor** :2006 onwards
Cochin University of Science and Technology
Cochin
- 6. HEAD, Department of Applied Chemistry** :2007 - 2010
Cochin University of Science and Technology (Rotation)
Cochin
- 7. HEAD, Department of Applied Chemistry** :2016 onwards
Cochin University of Science and Technology (Rotation)
Cochin

Over ELEVEN years of experience as professor in university system

EXPERIENCE

ACADEMICS

Over **TWENTY EIGHT** years of teaching experience in Chemistry at post-graduate level at Gandhigram Rural University, Tamil Nadu (1989 - 1999), India and at Cochin University of Science and Technology (1999 onwards), India.

Visiting Professor at Sultan Qaboos University, Muscat, Sultanate of Oman (Fall Semester – Sept. - 05 to Dec. - 05)

RESEARCH

Over **THIRY ONE** years of research experience in Analytical Chemistry.

ADMINISTRATION

- **Presently serving as Head, Department of Applied Chemistry, Cochin University of Science and Technology [From November 2016 onwards (rotation)]**
- **Head, Department of Applied Chemistry, Cochin University of Science and Technology [(2007-2010) (rotation)]**
- **Director, Internal Quality Assurance Cell, CUSAT**
- **Former Chairman, Board of Studies in Chemistry, CUSAT**
- **Former Member, Senate, CUSAT**
- **Member, Board of Studies in Chemistry, CUSAT**
- **Member, Academic Council, CUSAT.**
- **Member, Faculty of Science, CUSAT**
- **Member, Research Advisory Committee, Cochin University of Science and Technology, Kochi**

Ph.D. THESIS SUPERVISED (19)

1. G. Devala Rao - "Development of novel spectrophotometric methods for the determination of certain pharmaceuticals"
2. Saji John K. - "Polymeric complexes – Synthesis, characterization and analytical applications"
3. R. Muthuselvi - "Development of some novel reagents for the spectrophotometric determination of certain metals"
4. V. Otchan - "Development of polymeric ligands as novel metal ion removing reagents"
5. Remalakshmy Poduval - "Fabrication of potentiometric sensors for the determination of certain metal ions"
6. Jose P. Kallopparambil - "Synthesis, characterization and application studies of some polymer supported metal complexes"
7. Sareena John - "Fabrication of electrochemical sensors for pharmaceutical analysis"
8. Pearl Augustine - "Development of electrochemical sensors for the determination of certain pharmaceuticals"
9. Beena Saraswathyamma – "Fabrication of potentiometric sensors for the determination of lanthanide ions"
10. Mohanraj. K – "Synthesis and characterization of lanthanide complex of some biologically active ligands"
11. Sindhu Issac – "Fabrication of electrochemical sensors for the determination of pharmaceuticals"
12. Renjini Joseph - "Fabrication of electrochemical Sensors for Various Pharmaceuticals"
13. Sobhana Mathew – "Development of Macrocyclics based Electrochemical Sensors"
14. Leena R. – "Chemically modified glassy carbon electrode as sensors for various pharmaceuticals"
15. Laina A.L. – "Voltammetric sensors for the determination of pharmaceuticals"
16. Theresa C. J. – "Square wave voltammetric determination of various Pharmaceuticals"
17. Divya Thomas – "Development of Electrochemical and Fluorescent Sensors "
18. Anuja E. V. – "Novel Electrochemical and Fluorescence Sensors for Food additives and Neurotransmitters"

19 Soumya T Cyriac –“ Development of Electrochemical and optical sensors for some food additives and pharmaceuticals”

Ph. D thesis under progress : 07

M. Phil thesis supervised : 17

SPONSORED RESEARCH PROJECTS

1. “Methods for the Quality Control of Certain Drugs Using Dibromodimethyl Hydantoin” (**University Grants Commission, Govt. of India – 1991-1993**)
2. “Development of Extractive Spectrophotometric Methods for Determination of Lanthanides at Trace Level” (**University Grants Commission, Govt. of India – 1996-1998**)
3. “Synthesis of Novel Polymeric Complexes – A search for new Membrane Electrode and Ion Exchange Materials” (**Council of Scientific and Industrial Research Govt. of India - 1999-2002**)
4. “Development of Ion Selective Electrodes for the determination of Metal Ions” (**Defence Research and Development Organisation, Govt. of India – 2003-2007**)
5. “Fabrication of Biosensors for the determination of pharmaceuticals” (**Department of Science and Technology, Govt. of India - Indo-Polish S&T Programme– 2006-2008**)
6. “Development of Electrochemical Sensors for the Determination of Pharmaceuticals” (**Defence Research and Development Organisation, Govt. of India – 2006-2009**)
7. “Development of Novel Macrocyclics based Electrochemical Sensors for Metals” (**Kerala State Council for Science, Technology and Environment – 2010-2013**)
8. “Development of Electrochemical Sensors for Food Analysis” (**Defence Research and Development Organisation, Govt. of India – 2011-2014**)

9. Recipient of **UGC ONETIME RESEARCH GRANT(2014)**
10. Development of fluorescent sensors for pharmaceutical and clinical analysis. (**Kerala State Council for Science, Technology and Environment – 2016-2019**)
11. Development of sensors for compounds important for clinical analysis and food safety(**Department of Science and Technology, Govt. of India - Indo-Polish S&T Programme– 2017-2019**)

AREAS OF RESEARCH

1. Development of enzyme immobilized biosensors and optical sensors based on quantum dots for pharmaceutical analysis.
2. Fabrication of biosensors for determination of pharmaceuticals.
3. Fabrication of electrochemical sensors for determination of metal ions and pharmaceuticals.
4. Development of sensors based on Fluorescence.
5. Development of new Spectrophotometric methods for Pharmaceuticals.
6. Development of methods for trace analysis of metals.
7. Synthesis, characterization and application studies of Coordination complexes including polymeric complexes.
8. Environmental Chemistry and Pollution Monitoring.

CURRENT RESEARCH

Our group is actively involved in the fabrication of different types of chemical sensors , specifically electrochemical and optical sensors. Electrochemical sensors include potentiometric sensors, incorporating different types of ionophores – calixarenes, porphyrins, crown ethers, schiff bases, ion association complex etc are used for the determination of metal ions and drugs as well as voltammetric sensors for the analysis of drugs, food additives and biological molecules by modification of electrode surface using metalloporphyrins, conductind polymers, nanomaterials and self assembled monolayers. Currently the main focus of the group is on the development of fluorescence sensors and colorimetric sensors based on quantum dots,

nanomaterials etc. for environmental, food and clinical monitoring. The group is also working in the field of immunosensors and biosensors.

RESEARCH COLLABORATIONS

NATIONAL

Electrode division, CECRI (CSIR), Karaikudi, Tamilnadu, India

INTERNATIONAL

Department of Biosensors, Polish Academy of Sciences, Poland

MEMBERSHIP (Academic and Research Bodies)

1. Member, Editorial board, Journal of Biosensors and Bioelectronics, USA
2. Fellow of Indian Chemical Society.
3. **Vice President** , Indian Society for Electro Analytical Chemistry (ISEAC)
4. Former Member, Executive Committee, Central Instrumentation Centre, M.G. University, Kottayam, India
5. Member, Executive Committee, Advanced Centre of Environmental Studies and Sustainable Development, **M G University, Kottayam, Kerala**
6. Former Member, Governing Council, Inter University Centre for Nano Materials and Devices, Cochin University of Science and Technology, Kochi
7. Former Member, Advisory Committee, Centre for Science in Society, Cochin University of Science and Technology, Kochi
8. Member, Editorial Board, "Science Communicator" Cochin University of Science and Technology, Kochi
9. Member, American Nano Society
10. **Member NAAC Peer Team**

11. Member, National Academic Committee, Childrens Science Congress

OTHER ACADEMIC ACTIVITIES

- ◆ Member, Board of Studies in Chemistry, Amritha Viswavidhya Peetham, Coimbatore, India.
- ◆ Member, Board of Studies in Chemistry, Gandhigram Rural University, Tamil Nadu, India.
- ◆ Member, Board of Studies in Chemistry, Maharajas College (AUTONOMOUS), Ernakulam
- ◆ Member, Board of Studies in Chemistry, Vimala College (AUTONOMOUS), Trissur.
- ◆ Delivered a number of lectures in various colleges and universities.
- ◆ Ph. D thesis evaluator and examination board member of different universities.
- ◆ Served as UGC expert committee member for the selection of Commonwealth fellows.
- ◆ Served/serving as resource person in refresher courses conducted by different universities /colleges.
- ◆ Former member, Board of Editors, International Journal of Chemistry, Canada.
- ◆ **Coordinator,” SASTHRAYAN” a programme conducted by CUSAT to showcase the research result of the university to peoples representatives and public(2016).**

PEER REVIEWER FOR JOURNALS

- Talanta
- Analyst
- Indian Journal of Chemistry
- Indian Journal of Chemical Technology
- Bioresource Technology
- Applied Organometallic Chemistry
- Journal of Applied Polymer Science
- International Journal of Environmental Analytical Chemistry
- Journal of Solid State Electrochemistry

- Sensor Letters
- Drug Testing and Analysis
- Monatshefte für Chemie

SEMINARS/CONFERENCES ORGANISED

1. Co-Convener, National seminar on Newer Vistas in Bio-Active agents, Gandhigram University, Tamil Nadu (1999).
2. Convener, Matcon, Cochin University of Science and Technology (2001).
3. Coordinator, UGC sponsored refresher course for college teachers, Cochin University of Science and Technology (2002).
4. Chairman, National Seminar on Current Trends in Chemistry, Cochin University of Science and Technology (2008).
5. Chairman, International Conference on Materials (MATCON 2010), Kochi, January 2010.
6. Served/Serving as member of organising/ advisory Committee of different conferences/seminars.
7. Convener International Conference on Materials for the Millennium (MATCON 2016), Kochi, January 14-16

SCIENCE POPULARISATION PROGRAMMES ORGANIZED

- ❖ Conducted an all Kerala Chemistry Quiz competition for PG chemistry students in the year 2007 with the support of KSCSTE.
- ❖ Conducted a unique programme “**Magic of Chemistry**” (chemistry made easy) for Govt. and aided school students during 2008 with the support of Science & Technology museum, Govt. of Kerala.
- ❖ Conducted a one day seminar in connection with National Science Day celebrations during 2009 with the support of KSCSTE.
- ❖ Coordinator, **Inculcate programme** of Govt. of Kerala, conducted at CUSAT for 3 years.
- ❖ Coordinated **CSIR- NET National Exam** at Cochin centre for Four Times
- ❖ Chairman, sasthanprathibha matsaram conducted by Swadeshi Science Movement, Kerala for Four times.

- ❖ Convenor, Swadeshi Science Congress, M. G. University, Kottayam 2013.
- ❖ Coordinator, Children's Science Congress, Navodaya Vidyalaya Samiti Hyderabad Region.
- ❖ Published articles and a book on general topics.
- ❖ **Chief Coordinator, Guinness World Record Breaking Event "Largest Practical Science Lesson" held at IIT Delhi** organized in connection with India International Science Festival, December 7, 2015.
- ❖ **Chief Coordinator, Guinness World Record Breaking Event "Largest Biology Lesson" held at ANNA UNIVERSITY, CHENNAI** organized in connection with India International Science Festival, October 14, 2017.

➤ **Books published**

"Plastic Kathayum Karyavum"

(A book in Malayalam for popularization of Science published by NBS)

- ❖ **Research Publications (National and International): 101 (list attached)**
- ❖ **Research Papers in Conferences/ Seminars : 173 (list attached)**
- ❖ **Article on General Topics : 3 (list attached)**

➤ RESEARCH PUBLICATIONS

Papers published in International and National Journals

1. A. R. Jose, A. E. Vikraman, **K. Girish Kumar**, Photoinduced electron transfer between quantum dot and pralidoxime ; an efficient sensing strategy, *New J. Chem.* **41**, 10828 (2017)
2. Shalini Menon, **K. Girish Kumar**, Simultaneous voltammetric determination of acetaminophen and its fatal counterpart nimesulide by gold nano/L-cysteine modified gold electrode, *J. Electrochemi Soc.*, **164**, B482 (2017).
3. S. Jesny, **K. Girish Kumar**, Electrocatalytic resolution of guanine, adenine and cytosine along with uric acid on poly (4-amino-3-hydroxy naphthalene-1-sulfonic acid) modified glassy carbon electrode, *J. Electroanal. Chem.*, **801**,153 (2017).
4. Shalini Menon, **K. Girish Kumar**, A fluorescent biosensor for the determination of xanthine in tea and coffee via enzymatically generated uric acid, *LWT- Food Science and Technology*, **86**, 8 (2017).
5. A. Thomas, U. Sivasankaran, **K. Girish Kumar**, Biothiol induced colour change of silver nanoparticles: A colorimetric sensing strategy, *Spectrochim. Acta Mol. Biomol. Spectrosc.*, **188**, 113 (2018)
6. S. Jesny, **K. Girish Kumar**, Non-enzymatic electrochemical sensor for the simultaneous determination of xanthine, its methyl derivatives theophylline and caffeine as well as its metabolite uric acid, *Electroanalysis*, **29**, 1828 (2017)
7. S. Menon, **K. Girish Kumar**, Fluorescence Immunosensing of Insulin via Protein Functionalized Gold Nanoclusters, *J. Fluoresc.*, **27**, 1541 (2017). DOI 10.1007/s10895-017-2093-3
8. U. Sivasankaran, A. Thomas, A. R. Jose, **K. Girish Kumar**, Poly (Bromophenol Blue)-Gold Nanoparticle Composite: An Efficient Electrochemical Sensing Platform for Uric Acid, *J. Electrochem. Soc.*, **164**, B292 (2017).
9. S. Jesny, Z.Rasheed, **K. Girish Kumar**, A biopolymer-based voltammetric sensor for thymine: Elucidation of electrochemical kinetics, *Ionics* ,**23**, 1533 (2017) DOI 10.1007/s11581-016-1958-9.
10. U. Sivasankaran, S. Jesny, A. R. Jose, **K. Girish Kumar**, Fluorescence determination of glutathione using paper-derived carbon dots as fluorophores, *Anal. Sci.*, **33**, 281 (2017).

11. U. Sivasankaran, S. T. Cyriac, S. Menon, **K. Girish Kumar**, Fluorescence Turn off Sensor for Brilliant BlueFCF - an Approach Based on Inner Filter Effect, *J. Fluoresc.*, **27**, 69 (2017).
12. S. T. Cyriac, D. Thomas A. E. Vikraman, **K. Girish Kumar**, Electrochemical Sensor for Propyl gallate, based on Synergic Effect of Gold Nanoparticles and Poly(p-Aminobenzene sulfonic acid), *J. Electrochem. Soc.*, **14**, B683- B688, (2016).
13. S. Jesny, S. Menon, **K. Girish Kumar**, Simultaneous determination of Guanine and Adenine in the presence of Uric Acid by poly (para toluene sulfonic acid) mediated electrochemical sensor in alkaline medium, *RSC. Adv.*, **6**, 75741 (2016).
14. S. Menon, S. Jesny, U. Sivasankaran, **K. Girish Kumar**, Fluorimetric Determination of Epinephrine: A Green Approach, *Anal. Sci.*, **32**, 1 (2016).
15. S. Menon, A. R. Jose, S. Jesny, **K. Girish Kumar**, A colorimetric and fluorometric sensor for the determination of norepinephrine, *Anal. Methods*, **8**, 5801 (2016); COVER ARTICLE (5729).
16. A. R. Jose, U. Sivasankaran, S. Menon, **K. Girish Kumar**, A silicon nanoparticle based turn off fluorescent sensor for sudan I, *Anal. Methods*, **8**, 5701 (2016)
17. U. Sivasankaran, A. E. Vikraman, D. Thomas, **K. Girish Kumar**, Nanomolar Level Determination of Octyl Gallate in Fats and Oils, *Food Anal. Methods*, **9**, 2115 (2016)

Seminars/Conferences Papers

1. Simultaneous determination of Epinephrene and Homovanillic acid on Bromophenol Blue modified Glassy Carbon Electrode (Ammu Rosin Jose and **K. Girish Kumar**, Electrochem 2017, Brimingham).
2. Ultra-sensitive fluorescence assay for Pralidoxime (Ammu Rosin Jose and **K. Girish Kumar**, Prof. K.V. Thomas Endowment International Symposium on NEW TRENDS IN APPLIED CHEMISTRY (NTAC-2017); Sacred Heart College, Thevara)
3. Colorimetric sensing of Cysteine and Cysteamine (Ambily Thomas and **K. Girish Kumar**, Prof. K.V. Thomas Endowment International Symposium on NEW TRENDS IN APPLIED CHEMISTRY (NTAC-2017); Sacred Heart College, Thevara)
4. Voltammetric determination of propyl gallate using SAM modified glassy carbon electrode (Unni Sivasankaran and **K. Girish Kumar**, Prof. K.V. Thomas Endowment International Symposium on NEW TRENDS IN APPLIED CHEMISTRY (NTAC-2017); Sacred Heart College, Thevara)
5. Fluorescence sensing of xanthine via enzymatically generated uric acid (Shalini Menon and **K. Girish Kumar**, Prof. K.V. Thomas Endowment International Symposium on New Trends In Applied Chemistry (NTAC-2017), Sacred Heart College, Thevara, February 2017).
6. Voltammetric determination of Melatonin using Poly (p-Toluenesulfonic acid) modified glassy carbon electrode (Zafna Rasheed and **K. Girish Kumar**, Prof. K.V. Thomas Endowment International Symposium on NEW TRENDS IN APPLIED CHEMISTRY (NTAC-2017); Sacred Heart College, Thevara)
7. Polymer modified electrode as multianalyte sensor for Theophylline and Caffeine (Jesny S. and **K. Girish Kumar**, Prof. K.V. Thomas Endowment International Symposium on

- NEW TRENDS IN APPLIED CHEMISTRY (NTAC-2017); Sacred Heart College, Thevara, February 2017)
8. Polyethyleneimine-coated CdS/ZnS quantum dots: A fluorescent sensor for Anthrax Biomarker Detection (Gopika Bhaskar and **K. Girish Kumar**, Prof. K.V. Thomas Endowment International Symposium on NEW TRENDS IN APPLIED CHEMISTRY (NTAC-2017); Sacred Heart College, Thevara, February 2017)
 9. Fluorimetric determination of 2-PAM (Ammu Rosin Jose and **K. Girish Kumar**, A National Seminar on Current Trends in Chemistry CTriC 2017; Cochin University of Science and Technology, Kochi)
 10. Fluorescence Immunosensor for Insulin (Shalini Menon and **K. Girish Kumar**, A National Seminar on Current Trends in Chemistry CTriC 2017, Cochin University of Science and Technology, Kochi, January 2017).
 11. Biothiol induced color change of Ag NPs: Colorimetric Sensing Strategy. (Ambily Thomas and **K. Girish Kumar**, A National Seminar on Current Trends in Chemistry CTriC 2017; Cochin University of Science and Technology, Kochi)
 12. Poly (p-Toluenesulfonic acid) based sensor for the determination of Melatonin. (Zafna Rasheed and **K. Girish Kumar**, A National Seminar on Current Trends in Chemistry CTriC 2017; Cochin University of Science and Technology, Kochi)
 13. Quantification of Propyl Gallate in Food samples using Differential Pulse Voltammetry, (Unni Sivasankaran and **K. Girish Kumar**, A National Seminar on Current Trends in Chemistry CTriC 2017; Cochin University of Science and Technology, Kochi)
 14. Development of Voltammertic Sensor for the Determination of Green S Using Poly (glycine) Modified Glassy Carbon Electrode (Soumya T. Cyriac and **K. Girish Kumar**, A National Seminar on Current Trends in Chemistry CTriC 2017; Cochin University of Science and Technology, Kochi)
 15. Polymer Modified Electrode for the Simultaneous Sensing of Adenine and Guanine in DNA Samples (Jesny S. and **K. Girish Kumar**, A National Seminar on Current Trends in Chemistry CTriC 2017; Cochin University of Science and Technology, Kochi, January 2017)
 16. Rapid onsite determination of Dipicolinic acid by fluorescent CdS/ZnS quantum dots. (Gopika Bhaskar and **K. Girish Kumar**, A National Seminar on Current Trends in

- Chemistry CTriC 2017; Cochin University of Science and Technology, Kochi, January 2017)
17. “Turn off” fluorescence biosensor for xanthine and its use in food and clinical monitoring (Shalini Menon and **K. Girish Kumar**, 29th Kerala Science Congress; Mar Thoma College, Thiruvalla, January 2017).
 18. A dual channel optical sensor for norepinephrine (Shalini Menon and **K. Girish Kumar**, World Congress on Drug Discovery & Development; J.N. Tata Auditorium, Indian Institute Of Science, Bengaluru, September 2016).
 19. Poly (bromophenol blue) modified glassy carbon electrode for the voltammetric determination of Epinephrine (Ammu Rosin Jose and **K. Girish Kumar**, World Congress on Drug Discovery & Development; J.N. Tata Auditorium, Indian Institute of Science, Bengaluru, 2016)
 20. A colorimetric and fluorometric sensor for noradrenaline via insitu generated silver nanoparticles (Shalini Menon and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar, Central Marine Fisheries Research Institute, Kochi, November 2016).
 21. Voltammetric determination of Guanine and its primary metabolite Uric Acid, simultaneously in body fluids (Jesny S. and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar, Central Marine Fisheries Research Institute, Kochi, November 2016)
 22. Poly (bromophenol blue) modified glassy carbon electrode for the voltammetric determination of Adrenaline (Ammu Rosin Jose and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar; Central Marine Fisheries Research Institute, Kochi, 2016)
 23. Determination of cysteamine: A colorimetric approach (Ambily Thomas and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar; Central Marine Fisheries Research Institute, Kochi, 2016).
 24. Poly (p-Toluenesulfonic acid) modified glassy carbon electrode for the determination of Melatonin (Zafna Rasheed and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar, Central Marine Fisheries Research Institute, Kochi, November 2016).

25. Poly (glycine) modified glassy carbon electrode for the determination of Green S (Soumya T. Cyriac and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar; Central Marine Fisheries Research Institute, Kochi, 2016).
26. Square wave voltammetric determination of Uric Acid using poly (Bromophenol Blue) film modified glassy carbon electrode (Unni Sivasankaran and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar; Central Marine Fisheries Research Institute, Kochi, 2016).
27. Polyethyleneimine-Coated CdS/ZnS Quantum Dots: A Fluorescent Sensor for Anthrax Biomarker Detection (Gopika Bhaskar and **K. Girish Kumar**, 26th Swadeshi Science Congress, A National Seminar; Central Marine Fisheries Research Institute, Kochi, 2016).
28. A dual channel optical sensor for norepinephrine (Shalini Menon and **K. Girish Kumar**, International Seminar on Recent Advances in Solar Energy Applications (RASE 2016); St. Teresa's College, Ernakulam, December 2016).
29. Evaluation of Kinetic Parameters of Electro Oxidation of Thymine on a Poly (l Glutamic Acid) modified Glassy Carbon Electrode. (Jesny S. and **K. Girish Kumar**, National Symposium Electrochemical Science and Technology NSEST, IISc Bangalore, July 2016).
30. Electrochemical determination of Uric Acid in alkaline media on a Glassy Carbon electrode modified with poly (p-toluene sulfonic acid). (Shalini Menon, Jesny S. and **K. Girish Kumar**, National Symposium Electrochemical Science and Technology NSEST, IISc Bangalore, July 2016).
31. A simple and sensitive fluorescent sensor for the determination of Epinephrine (Shalini Menon and **K. Girish Kumar**, Frontier Areas in Chemical Technologies FACTs 2016, Alagappa University , Karaikudi, March 2016).
32. Glassy Carbon Electrode modified with poly (Glutamic Acid) as a probe for the voltammetric determination of Thymine. (Jesny S. and **K. Girish Kumar**, Frontier Areas in Chemical Technologies FACTs 2016, Alagappa University , Karaikudi, March 2016).
33. Determination of Nitrite contamination in ground water : A green Approach (Shalini Menon and **K. Girish Kumar**, Kerala Science Congress, Calicut, January 2016)

34. Voltammetric Sensing of Tamsulosin on Poly(o-phenylene diamine) Modified Gold Electrode (Theresa J. and **K.Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
35. Electrochemical Deposition of Gold Nanoparticles on Poly (p-Amino Benzene Sulphonic Acid) Film Modified Glassy Carbon Electrode and Voltammetric Determination of Metronidazole Benzoate (Sindhu I. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
36. Carbon Nanotube and Polypyrrole Based Electrochemical Sensor for the Selective Determination of Tamsulosin Hydrochloride (Renjini J. and **K. Girish Kumar** MatCon2016, CUSAT , Kochi, January 2016)
37. Electrochemical Distinction of Trimethoprim and Ambroxol on Metalloporphyrin Modified Glassy Carbon Electrode (Leena R. and **K. Girish Kumar** MatCon2016, CUSAT , Kochi, January 2016)
38. The Electrochemical Behavior of Amoxicillin Trihydrate at Multiwalled Carbon Nanotube/Platinum Nanoparticle Modified Glassy Carbon Electrode (Laina A. L. and **K. Girish Kumar** MatCon2016, CUSAT , Kochi, January 2016)
39. Poly (glycine) Modified Glassy Carbon Electrode for the Voltammetric Determination of Azorubine in Soft Drinks (Zafna R. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
40. Poly (Aspartic Acid) Modified Glassy Carbon Electrode for the Determination of Adenine (Jesny S. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
41. Poly (L-cysteine) Modified Glassy Carbon Electrode for the Determination of Cochineal Red A Soumya T. C. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
42. MWCNT - Modified Gold Electrode Sensor for the Determination of TBHQ (Ambily T. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
43. A New Chemically Modified Carbon Paste Sensor Based on Schiff's Base for Pr(III) Ion (Beena S. and **K. Girish Kumar** ,MatCon2016, CUSAT, Kochi, January 2016)
44. Gold Nano Cluster Based Fluorescence Sensor for the Selective Determination of Norepinephrine (Anuja E. V. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)

45. Sensing of Brilliant Blue FCF using Cadmium Sulphide Quantum Dots (Unni S. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
46. Synthesis of Thioglycerol Functionalized Cadmium Telluride Quantum Dot for the Determination of Mercury Ion (Meera J. and **K. Girish Kumar**. MatCon2016, CUSAT , Kochi, January 2016)
47. A Fluorescent Sensor for the Determination of Sudan 1 (Ammu R. J. and **K. Girish Kumar**, MatCon2016, CUSAT , Kochi, January 2016)
48. Green carbon nanoparticles for the “Turn On” fluorescence determination of nitrite in milk (Shalini Menon and **K. Girish Kumar**, MatCon2016, Kochi, January 2016).
49. Development of a Fluorescent Sensor for the Determination of Ferric Ion (Divya T. and **K. Girish Kumar**,. MatCon2016, CUSAT , Kochi, January 2016)
50. Electrochemical sensing of Pyridine-2-aldoxime chloride on modified gold Electrodes (Theresa Jos, **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015).
51. Development of fluorescent sensor for the determination of Butylated hydroxyanisole (Divya Thomas, **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)
52. Gold nanocluster based fluorescent sensor for butylated hydroxyanisole (Anuja E.V., **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)
53. Poly (L-cysteine) modified glassy carbon electrode for the determination of Cochineal Red A (Soumya T. Cyriac, **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)
54. Electrochemical behaviour of Metanil Yellow on a bare gold electrode (Jesny S., **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)
55. Poly (p-amino benzene sulfonic acid) modified glassy carbon electrode for the determination of food colorant (Zafna Rasheed, **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)
56. Synthesis of determination of Mercury (II) ion in well water using thioglycerol functionalised cadmium telluride quantum dots (Meera Jacob, **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)
57. Fluorescence sensor for the determination of Sudan dyes(Ammu Rosin Jose, **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)

58. Determination of Nitrite Pollution in Soil using Fluorescent Nanoparticles (Shalini Menon, **K. Girish Kumar**, Swadeshi Science Congress, Kalady, December 2015)
59. Electrochemical sensing of Metronidazole benzoate on a conducting polymer layer of p-TSA on GCE (Theresa C. J., **K. Girish Kumar**, National Seminar at S.H. Thevara, December 2014).
60. Voltammetric Determination of Octyl Gallate using SAM modified Glassy Carbon electrode, (Unni Sivasankaran, **K. Girish Kumar**, National Seminar at S.H. Thevara, December 2014).
61. Voltammetric Determination of Sunset Yellow using MWCNT/AuNP Nanocomposite Film Modified glassy carbon electrode, (Anuja. E.V., **K. Girish Kumar**, National Seminar at S.H. Thevara, December 2014).
62. Development of voltammertic sensor for the determination of allura red using poly (l-cysteine) modified glassy carbon electrode (E.V. Anuja, **K. Girish Kumar**, Swadeshi Science Congress, Tirur, November 2014)
63. Voltammetric determination of butylated hydroxyanisole (BHA) on poly (L- cysteine) modified glassy carbon electrode (Divya Thomas, **K. Girish Kumar**, Swadeshi Science Congress, Tirur, November 2014)
64. Colourimetric Sensor for Tetracycline (Soumya T Cyriac, **K. Girish Kumar**, Swadeshi Science Congress, Tirur, November 2014)
65. Electrochemical sensing of tinidazole on modified glassy carbon electrodes (Theresa Jos, **K. Girish Kumar**, Swadeshi Science Congress, Tirur, November 2014)
66. Self assembled monolayer modified glassy carbon electrode for the determination of octyl gallate (Unni Sivasankaran, **K. Girish Kumar**, Swadeshi Science Congress, Tirur, November 2014)
67. Electrochemical sensors (**K. Girish Kumar**, Innovations in Electrochemical Science and Technology, (IEST) NIT-Warangal, December-2013).
68. Study of electrochemical oxidation of sulphite on a gold electrode modified with multi-walled carbon nano-tubes (Jesny S., **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).

69. Manganese (ii) –selective potentiometric sensor based on calix[4]resorcinarene in pvc matrix (Shobhana Mathew, **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
70. Development of multiwalled carbon nanotube modified platinum electrode sensor for the voltammetric determination of guaifenesin (Theresa C. J., **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
71. Nanotube modified gold electrode for the determination of pam chloride (Theresa C.J., **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
72. Poly (eriochrome black t) modified electrode for the voltammetric determination of tinidazole (Leena R., **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
73. Cobalt (II) selective pvc membrane electrode based on a new tetraaza macrocyclic ligand (Sruthy C.B., **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
74. Development of sensor for amoxicillin trihydrate (Laina A.L., **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
75. Development of gold nanoparticle based voltammetric sensor for the determination of sunset yellow (Anuja E. V., **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
76. Development of multiwalled carbon nanotube based sensor for sulfamethoxazole (Sindhu Issac, Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
77. Gold nanoparticle modified glassy carbon electrode sensor for the voltammetric determination of sudan I in food samples (Divya Thomas, **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
78. Development of poly(bromophenol blue) modified glassy carbon electrode based sensors for the determination of synthetic antioxidant tert-butylhydroquinone (Soumya T. C. **K. Girish Kumar** Swadeshi Science Congress, November 2013, M.G. University, Kottayam).

79. Development of poly(o-aminophenol) modified gold sensor for the determination of ceftriaxone sodium (Theresa C. J., **K. Girish Kumar**, Swadeshi Science Congress, November 2013, M.G. University, Kottayam).
80. Carbon nitride dots based fluorescent sensor for the determination of BHA in food samples. (Anuja E. V., **K. Girish Kumar** CTric, Cochin University of Science and Technology, March, 2013, Kochi).
81. Differential pulse voltammetric determination of amaranth using MWCNT (Sreejith Chandran, **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2013, Kochi).
82. Electrochemical determination of guaiphenesin on a Pt electrode incorporating the 1-d character of MWNT. (Theresa C. J. **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2013, Kochi).
83. Development of nanoparticle based sensors for the determination of amoxicillin. (Iaina A.L., **K. Girish Kumar** CTric, Cochin University of Science and Technology, March, 2013, Kochi).
84. Electroanalytical method for the determination of a synthetic antioxidant tert-butylhydroquinone. (Soumya T. C., **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2013, Kochi).
85. Development of gold nanoparticle modified glassy carbon electrode Sensor for the voltammetric determination of sunset yellow. (Anuja E. V., **K. Girish Kumar** CTric, Cochin University of Science and Technology, March, 2013, Kochi).
86. Film Modified Electrodes for Voltammetric Sensing of Pharmaceuticals. (**K. Girish Kumar**, RASS – 2013, Gandhigram Rural Institute- Deemed University, February 2013, Tamil Nadu).
87. Propyl Gallate sensing through multi walled carbon nanotube (MWCNT) modified gold electrode (Anuja E. V., **K. Girish Kumar**, RASS – 2013, Gandhigram Rural Institute- Deemed University, February 2013, Tamil Nadu).
88. A multiwalled carbon nanotube modified gold sensor for the determination of Amaranth. (Sreejith Chandran, **K. Girish Kumar**, RASS – 2013, Gandhigram Rural Institute- Deemed University, February 2013, Tamil Nadu).

89. Voltammetric sensor for bromate. (Shanthy A. A., **K. Girish Kumar**, RASS – 2013, Gandhigram Rural Institute- Deemed University, February 2013, Tamil Nadu).
90. Surface modification of gold electrode with multiwalled carbon nanotubes for sulphite sensing. (Jesny S., **K. Girish Kumar**, RASS – 2013, Gandhigram Rural Institute- Deemed University, February 2013, Tamil Nadu).
91. Voltametric determination of tamsulosin on a p(opd)/Au electrode. (Theresa C.J., **K. Girish Kumar**, RASS – 2013, Gandhigram Rural Institute- Deemed University, February 2013, Tamil Nadu).
92. Sensing through polymeric films - Voltammetric determination of some pharmaceuticals. (**K. Girish Kumar**, ELAC-2013, ISEAC, January 2013, Hyderabad).
93. Nanoparticle based sensor for the quantification of amoxicillin. (Laina A.L., **K. Girish Kumar** ELAC-2013, ISEAC, January 2013, Hyderabad).
94. Development of mutiwalled carbon nanotube modified platinum electrode sensor for the voltammetric determination of guaiphenesin. (Theresa C.J., **K. Girish Kumar** ELAC-2013, ISEAC, January 2013, Hyderabad).
95. PAM chloride sensing through mutiwalled carbon nanotube. (Theresa C.J., **K. Girish Kumar** ELAC-2013, ISEAC, January 2013, Hyderabad).
96. PB/MWNT composite based sensor for the determination of hesperidin methyl chalcone. (Laina A.L., **K. Girish Kumar** Swadeshi Science Congress, November 2012, Kasaragod).
97. Electrochemical oxidation of Propyl Gallate on a multi walled carbon nanotube (MWCNT) modified gold electrode sensor. (Anuja E.V., **K. Girish Kumar**, Swadeshi Science Congress, November 2012, Kasaragod).
98. Electrochemical determination of amaranth using multiwalled carbon nanotube modified gold sensor. (Sreejith Chandran, **K. Girish Kumar**, Swadeshi Science Congress, November 2012, Kasaragod).
99. TMOPPMn(III) Cl modified gold electrode sensor for the determination of nitrite in food samples. (Divya Thomas, **K. Girish Kumar**, Swadeshi Science Congress, November 2012, Kasaragod).

100. Development of multi walled carbon nanotube (MWCNT) modified Platinum electrode sensor for the voltammetric determination of BHA (Zafna Rasheed, **K. Girish Kumar**, ICBAM, Gandhigram Rural Institute- Deemed University, March 2012, Tamil Nadu).
101. Nanoparticle probe for the detection of Tetracycline (Soumya T.C., **K. Girish Kumar**, ICBAM, Gandhigram Rural Institute- Deemed University, March 2012, Tamil Nadu).
102. Potentiometric sensor for determination of Fe^{2+} in pharmaceuticals (Shinu P.J., **K. Girish Kumar** ICBAM, Gandhigram Rural Institute- Deemed University, March 2012, Tamil Nadu).
103. Quantum dots based fluorescent probe for the selective determination of Nimesulide (Divya Thomas, **K. Girish Kumar**, Kerala Science Congress, January, 2012, Kottayam)
104. Carbon nanotube modified gold sensor in food analysis- Determination of propyl gallate (Anuja E.V., **K. Girish Kumar**, Kerala Science Congress, January, 2012, Kottayam)
105. Gold nanoparticle modified electrodes - Development of Sensors for some Pharmaceuticals (**K. Girish Kumar** , ISEAC International symposium cum workshop on electrochemistry, December, 2011, Goa).
106. Fabrication PVC membrane and carbon paste potentiometric determination of Lamivudine and its applications (Pearl Augustine, **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2011, Kochi).
107. Voltammetric behavior of sulfite on a gold electrode modified with multiwalled carbon nanotubes. (Jesny S., **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2011, Kochi).
108. Voltammetric determination of PAM Chloride using PB/MWCNT modified gold electrode. (Theresa C.J., **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2011, Kochi).
109. Carbon nanotube based sensor for voltammetric determination of Hesperidin methyl chalcone (Laina A. L., **K. Girish Kumar** CTric, Cochin University of Science and Technology, March, 2011, Kochi).
110. Development of a PVC membrane sensor based on metalloporphyrin as ionophore for salicylate ions. (Shobhana Mathew, **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2011, Kochi).

111. Voltammetric sensor for the determination of pyrine-2-aldoxime methochloride at 2-mercaptobenzothiazol and multiwalled carbon nanotube modified gold electrode. (Renjini Joseph, **K. Girish Kumar**, CTric, Cochin University of Science and Technology, March, 2011, Kochi).
112. Metalloprphyrin complexes as sensing materials in the electrochemical determination of certain pharmaceuticals (**K. Girish Kumar**, ISEAC International discussion meet on electrochemistry and its applications, February, 2011, Trivandrum).
113. A new PVC membrane sensor for neodymium (III) based on N¹,N²-bis(salicylidine)butane-1,4-diamine. (Beena S., **K. Girish Kumar**, National Convention of Electrochemists-15, February, 2010, VIT University).
114. Electrochemical behaviour of sulfamethoxazole on a polymalachite green based glassy carbon electrode. (Leena R., **K. Girish Kumar**, National Convention of Electrochemists-15, February, 2010, VIT University)
115. Development of an AuNP/polyPABSA-modified glassy carbon sensor for the voltammetric determination of metronidazole benzoate. (Theresa C. J, **K. Girish Kumar** National Convention of Electrochemists-15, February, 2010, VIT University).
116. Electrochemical sensor for the determination of acyclovir based on 2-mercaptobenzothiazol-[5,10,15,20-tetrakis (3-methoxy-4-hydroxy phenyl) porphyrinato] Cu(II) –modified gold electrode. (Renjini Joseph, **K. Girish Kumar**, National Convention of Electrochemists-15, February, 2010, VIT University).
117. Carbon nanotube based sensor for the differential pulse voltammetric determination of tamsulosin hydrochloride. (Laina A.L., **K. Girish Kumar** 1st Kerala Women's Science Congress, August, 2010, Kochi).
118. Development of poly aniline modified gold electrode sensors for the voltammetric determination of trimethoprim. (Renjini Joseph, **K. Girish Kumar**, 1st Kerala Women's Science Congress, August, 2010, Kochi).
119. Electrochemical sensor for the determination of nimesulide based on AuNP/poly-cystamine modified glassy carbon electrode. (Sindhu Issac, **K. Girish Kumar** , 1st Kerala Women's Science Congress, August, 2010, Kochi).

120. A TMoPPMn(III)Cl modified gold electrode sensor for the determination of nitrite in food samples using differential pulse Voltammetry. (Divya Thomas, **K. Girish Kumar**, 1st Kerala Women's Science Congress, August, 2010, Kochi).
121. Development of voltammetric sensors for lamivudine base on L-Cysteine modified glassy carbon electrode. (Sindhu Issac, **K. Girish Kumar**, MATCON, Cochin University of Science and Technology, January, 2010, Kochi).
122. Determination of Ambroxol on metalloporphyrin modified glassy carbon electrode using various voltammetric techniques. (Leena R., **K. Girish Kumar**, MATCON, Cochin University of Science and Technology, January, 2010, Kochi).
123. A new PVC membrane sensor for samarium. (Beena s., **K. Girish Kumar**, MATCON, Cochin University of Science and Technology, January, 2010, Kochi).
124. Voltammetric determination of sulfamethaxazole on modified carbon paste electrode. (Renjini Joseph, **K. Girish Kumar**, MATCON, Cochin University of Science and Technology, January, 2010, Kochi).
125. Nickel (II) selective potentiometric sensor based on 3, 4- Dimethoxy calix[4] resorcinarene in PVC matrix. (Shobhana Mathew, **K. Girish Kumar**, MATCON, Cochin University of Science and Technology, January, 2010, Kochi).
126. Electrochemical Sensors in Drug Analysis. (**K. Girish Kumar**, National Seminar on Emerging Trends in Pharmaceutical Analysis, February 2009, Vijayawada).
127. The electrochemical behavior of PAM Chloride at a multiwalled carbon nanotube-nafion modified Platinum electrode. (Laina A. L., **K. Girish Kumar** National Seminar on Emerging Trends in Pharmaceutical Analysis, February 2009, Vijayawada).
128. Characterisation of multiwalled carbon nanotube modified gold electrode and voltammetric determination of PAM Chloride. (Theresa C.J., **K. Girish Kumar**, National Seminar on Emerging Trends in Pharmaceutical Analysis, February 2009, Vijayawada).
129. Electrocatalytic oxidation of Trimethoprim at [5,10,15,20-tetrakis(4-methoxyphenyl) porphyrinato] Mn (III) chloride modified Glassy Carbon Electrode and its analytical applications. (Leena R., **K. Girish Kumar**, Frontiers in Chemical Research, December 2008, Mangalore University).

130. Metalloporphyrin based voltammetric sensor for the determination of Metronidazole benzoate. (Renjini Joseph, **K. Girish Kumar**, Frontiers in Chemical Research, December 2008, Mangalore University).
131. Development of poly(p- Toluene Sulfonic Acid) based voltammetric sensor for the determination of PAM- Chloride. (Sindhu Issac, **K. Girish Kumar**, Current Advances in Chemical Science, November 2008, Thevara).
132. Electrochemical sensor for the determination of Tinidazole based on [5,10,15,20-tetrakis(3- methoxy- 4- hydroxy phenyl) porphyrinato] Zn (II) mercaptobenzothiazole modified gold electrode. (Renjini Joseph, **K. Girish Kumar**, Current Advances in Chemical Science, November 2008, Thevara).
133. Development of potentiometric sensors for the selective determination of Ketoconazole and its application to pharmaceutical analysis. (Pearl Augustine, **K. Girish Kumar**, National Seminar on Current trends in Chemistry, Cochin University of Science and Technology, Kochi, India, 2008).
134. Development of a carbon nanotube based voltammetric sensor for the determination of sulfamethoxazole in pure form, dosage forms and in urine sample. (Sindhu Issac, **K. Girish Kumar**, National Seminar on Current Trends in Chemistry, Cochin University of Science and Technology, Kochi, India, 2008).
135. Voltammetric determination of sulfamethoxazole at a bis(2,2'-bipyridyl) Cu(II) complex modified carbon paste electrode.(Renjini Joseph, **K. Girish Kumar**, National Seminar on Current Trends in Chemistry, Cochin University of Science and Technology, Kochi, India, 2008).
136. A Novel Schiff base Modified Carbon Paste Sensor for Samarium. (Beena S., **K. Girish Kumar**, National Seminar on Current Trends in Chemistry, Cochin University of Science and Technology, Kochi, India, 2008).
137. Development of potentiometric and voltammetric sensors for the determination of ambroxol. (Pearl Augustine, **K. Girish Kumar** National seminar on sensors and its applications, Trichy , 2007).
139. Development of a carbon nanotube based voltammetric sensor for the determination of Ambroxol in pharmaceutical and urine samples (Sindhu Issac, **K. Girish Kumar**, The

- 8th International Workshop on Biosensors And Bioanalytical μ -Techniques in Environmental and Clinical Analysis, Goa, India, 2007.
140. A Solid State Sensor For Manganese ions (**K. Girish Kumar** , Remalekshmy Poduval, International Seminar on Materials For The Millennium, Cochin University of Science and Technology, Kochi, India, 2007).
 141. PVC Matrix Membrane Sensors for the potentiometric determination of Dextromethophan (**K. Girish Kumar**, Sareena John, Pearl Augustine, International Seminar on Materials For The Millennium, Cochin University of Science and Technology, Kochi, India, 2007).
 142. Determination of Diclofenac sodium in Pharmaceutical preparations by PVC Membrane and Carbon paste Electrodes (**K. Girish Kumar**, Sareena John, Pearl Augustine, International Seminar on Materials For The Millennium, Cochin University of Science and Technology, Kochi, India, 2007).
 144. Fabrication of Highly Selective PVC Membrane Sensor For Praseodymium (**K. Girish Kumar**, Beena S., International Seminar on Materials For The Millenium, Cochin University of Science and Technology, Kochi, India, 2007).
 145. Fabrication of a Potentiometric Sensor For The Determination Of Tetracycline (**K. Girish Kumar** Litha V.K., International Seminar on Materials For The Millennium, Cochin University of Science and Technology, Kochi, India, 2007).
 146. Voltammetric Determination Of Ambroxol using Multiwall Nanotube – Nafion Modified Glassy Carbon Electrode (**K. Girish Kumar** , Sindhu Issac, International Seminar on Materials For The Millennium, Cochin University of Science and Technology, Kochi, India, 2007).
 147. Fabrication of a PVC membrane sensor for the determination of nimesulide in pharmaceutical formulation (**K. Girish Kumar**, Remalakshmy Poduval, National Seminar on Frontiers in Chemistry, Cochin University of Science and Technology, Kochi, India, 2006).
 148. Fabrication of a novel tetracycline membrane sensor and its application to pharmaceutical analysis (**K. Girish Kumar** , Sareena John, National Seminar on Frontiers in Chemistry, Cochin University of Science and Technology, Kochi, India, 2006).

149. Fabrication of a nickel ion sensor (**K. Girish Kumar**, Sareena John, National Seminar on Frontiers in Chemistry, Cochin University of Science and Technology, Kochi, India, 2006).
150. Fabrication of Lanthanum sensor for water analysis (**K. Girish Kumar**, Beena S., International conference on The Challenges and Strategies for the sustainability of safe drinking water Gandhigram Rural Institute, Tamil Nadu 2006),
151. Fabrication of copper sensor for water analysis (**K. Girish Kumar**, International conference on The Challenges and Strategies for the sustainability of safe drinking water Gandhigram Rural Institute, Tamil Nadu 2006).
152. Nickel (II) selective plasticized membrane potentiometric sensor using a Schiff base (**K. Girish Kumar**, Remalakshmy Poduval, The 6th East Asia Conference on Chemical Sensors, Gulin, China, 2005).
153. Differential Pulse Voltammetric Determination of Sparfloxacin in Pure Form and in Dosage Forms (**K. Girish Kumar**, Remalakshmy Poduval, Pearl Augustine, National seminar on Emerging Trends and New Vistas in Chemistry, Calicut University, Kerala, 2005).
154. Fabrication of a Novel Potentiometric Sensor for the Determination of Terazosin (**K. Girish Kumar**, Remalakshmy Poduval, Pearl Augustine, National seminar on Emerging Trends and New Vistas in Chemistry, Calicut University, Kerala, 2005).
155. A novel Manganese selective plasticized membrane sensor using a Schiff base as ionophore (**K. Girish Kumar**, Pearl Augustine, National seminar on Emerging Trends and New Vistas in Chemistry, Calicut University, Kerala, 2005).
156. Synthesis, Structural Characterization and Anti-inflammatory activity of Lanthanide (III) complexes of Diclofenac sodium. (**K. Girish Kumar**, National Symposium on Currents Trends in Inorganic Chemistry, Cochin University of Science and Technology, Kochi, India, 2004).
157. Metal-iodate: A chromogenic reagent for the determination of Nimesulide. (**K. Girish Kumar** National Seminar on 'Recent Research Trends in Drug Delivery Systems' at the Andhra University, Vishakapatnam, Andhra Pradesh, India, 2001).

158. Determination of Cefotaxime Sodium in dosage forms by spectrophotometry. (**K. Girish Kumar** National Conference on Materials for the new millennium, Cochin University of Science and Technology, Kochi, India, 2001).
159. Spectrophotometric determination of meloxicam in pharmaceutical formulations. (**K. Girish Kumar** National Conference on Materials for the new millennium, Cochin University of Science and Technology, Kochi, India, 2001).
160. Synthesis and characterization of polymeric complexes of transition metals. (**K. Girish Kumar**, National Conference on Materials for the new millennium, Cochin University of Science and Technology, Kochi, India, 2001).
161. Estimation of Nimesulide in dosage forms by colorimetric. (**K. Girish Kumar**, International Seminar on Analytical Techniques in Monitoring the Environment held at Sri Venkateswara University, Tirupati, Andhra Pradesh, India, 2000).
162. Spectrophotometric determination of salmeterol xinafoate in dosage forms with Ferric nitrate reagent. (**K. Girish Kumar**, 19th Annual Conference of Indian Council of Chemists, Shimoga, Karnataka, India, 2000).
163. Visible spectrophotometric method for the determination of Cefotaxime Sodium in dosage forms. (**K. Girish Kumar**, 19th Annual Conference of Indian Council of Chemists, Shimoga, Karnataka, India, 2000).
164. Spectrophotometric determination of Cefotaxime sodium in dosage forms. (**K. Girish Kumar**, National Seminar on Newer Vistas in Bio-active Agents held at Department of Chemistry, Gandhigram Rural Institute, Gandhigram, TamilNadu).
165. Colorimetric determination of Lomefloxacin in bulk and in dosage forms. (**K. Girish Kumar** , 18th Annual Conference of Indian Council of Chemists, Jalgaon, India, 1999).
166. Spectrophotometric determination of salmeterol xinafoate using diazotised sulphanilamide. (**K. Girish Kumar** , 18th Annual Conference of Indian Council of Chemists, Jalgaon, India, 1999).
167. Spectrophotometric estimation of Nimodipine in pharmaceutical formulations. (**K. Girish Kumar**, 50th Indian Pharmaceutical Congress and 17th FAPA Congress, Mumbai, India, 1998).
168. Use of Chemical Pesticides – Impact on Food Safety. (**K. Girish Kumar**, National Workshop on Food Security at Gandhigram, India, 1998).

169. Spectrophotometric determination of Nitrendipine in Pure Form and Dosage Forms with methyl benzothiazolinone hydrazone hydrochloride. (**K. Girish Kumar** , 17th Conference of Indian Council of Chemists, India, 1998).
170. Spectrophotometric determination of Nickel (II) using Hydrazine Hydrate. (**K. Girish Kumar** , 16th Conference of Indian Council of Chemists, Mangalore, India, 1997).
171. Determination of Ranitidine in Pure Form and Dosage Forms using *N,N*-dibromo dimethylhydantoin. (**K. Girish Kumar** . 33th Annual Convention of Chemists, Coimbatore, India, 1996).
172. Titrimetric determination of Paracetamol with *N*-bromophthalimide and *N*-bromosaccharin. (**K. Girish Kumar** . Nehru Centenary Science Seminar, Trivandrum, Kerala, India, 1990).
173. Titrimetric determination of Vitamin C present in various pharmaceutical preparations. (**K. Girish Kumar** , 25th Annual Convention of Chemists, Calcutta, India, 1988).

■ CUSAT conducts a talent hunt for the country's future scientists

Back to the basics

KRISHNA KUMAR K.E. | DC
KOCHI, FEB. 22

It was a day to cherish for a group of bright eighth standard students from across the State when they got an opportunity to do scientific experiments and fire away questions to an IAS officer.

"We were on a journey to an entirely different world that begins with atoms and extends all the way up to the Antarctica Sea. The session with Swagath Bhandari IAS, Assistant Collector, Ernakulam, was really motivational. It was an eye-opener when she told us how she chose her career and overcame the hurdles," said Atul Raj, student of HSS Srikrishnapuram, Palakkad.

He was among the 60 students selected for 'Inculcate 2012' held at CUSAT campus in Kochi after a state-wide competitive exam held by the Kerala State Science and Technology Museum (KSSTM).

The idea was to spot talent in basic sciences early and mould them by offering scholarships at school-level.

"Nowadays, only a few among the bright students opt for courses other than medicine or engineering. So the programme is an attempt to attract talented students to basic sciences," Dr Girish Kumar K, Professor, Department of Applied Chemistry, CUSAT, said.

A total of 20,000 students sat for the exam that tested their knowledge in basic sciences and 300 of them came out trumps.

"They were divided into five groups of 60 before they attended the talent pruning camps at five universities including CUSAT. Each university will select 50 students and provide them a monthly stipend of ₹750 till they pass the 12th standard exam. Mentors will be allotted to them to help

Students during the training in basic science as part of the Inculcate 2012 programme in CUSAT, Kochi. Sixty students from across the state took part in the programme.

Dr Girish Kumar. K

them excel in their chosen field," Kumar said.

Swagath Bhandari termed the interaction "vibrant" and observed that the kids were really curious about the happenings around them.

"I asked them to choose a career according to their capability and aptitude and cultivate the habit of reading," she told *Deccan Chronicle*.

"One student asked me why I chose civil service to which I replied that my idea was to serve the poor. He then said there were so many other ways to serve the poor," she

said, smiling.

The children virtually had a peep into the polar region, thanks to the lecture by Dr A.A. Mohammed Hatha, Associate Professor, Department of Marine Biology, CUSAT.

The students had the rare opportunity to familiarise themselves with the life and culture of the Arctic region.

The students also had the opportunity to do experiments in chemistry, physics, mathematics and biotechnology laboratories and understand the principles behind

them.

A quiz programme on basic sciences was another session that they enjoyed.

"I was really thrilled to know about distinct bacteria and virus in biotechnology, working of simple pendulum in physics, fun problems in mathematics. I had the shock of my life when I learned about the adulterants that can get into our body and was amazed to see artificial sun setting in the chemistry lab," said Aiswarya M.V, an eight standard student from Kozhikode.

Hunt for the most talented

■ 60 students selected for 'Inculcate 2012' held at CUSAT campus in Kochi

■ A state-wide exam held by the Kerala State Science and Technology Museum

■ Idea was to spot talent in basic sciences early and mould them by offering scholarships at school-level.

Biosensors for quality control

Biosensors are fast becoming an important tool in research and commercial applications as they can identify specific targets in the human body and environment

simply science

have caught the interest of the industry because of their remarkable ability in detection, experimental simplicity and low cost. The Department of Applied Chemistry at Cusat has been working on electrochemical sensors to detect metal ions and drugs in the human body.

Working on research projects funded by the Defence Research and Development Organisation (DRDO), the team has made biosensors to detect metal ions and drug residues. "Clinical trials will be done later by the funding agency. We have handed over the technology to the DRDO," said K Girish Kumar, professor and head, Department of Applied Chemistry, Cusat.

"When we finished 'Fab-

rication of potentiometric sensors for the determination of metal ions' for DRDO, we got the next project. 'Development of electrochemical sensors for the determination of pharmaceuticals', which has been completed," he said.

The team had an international collaboration with the Polish Academy of Sciences, a bilateral research programme of Department of Science and Technology (DST).

Girish says that the electrochemical sensors group plans to take up active research on enzyme immobilised biosensors and develop new Voltametric sensors for checking the quality of food in the market.

"Our ultimate aim is to develop disposable sensors," he said.

Sudha Nambudiri
sudha@expressbuzz.com

WITH most people becoming conscious and aware of the quality of food, water and medicine, biosensors have started to play an important role in our lives. They are fast becoming an important tool in research and commercial applications as they can identify specific targets in the human body and environment.

Glucose monitoring is familiar to most of us. Researchers are now working on remote sensing of air-

borne bacteria in bio-welfare, detection of pathogens, determining levels of toxic substances before and after bioremediation, routine blood urine analysis, drug residues in food and the human body.

While human senses provide essential information about our close environment, researchers are looking for new sensors that will give us an analysis of the food we eat, the water we drink and the air we breathe. This requires novel chemical sensors, molecular recognition and signal transduction.

Electrochemical sensors

The New Indian Express

KOCHI, Monday, 11 January, 2010

മരുന്നിലെയും ഭക്ഷണത്തിലെയും പദാർത്ഥങ്ങളുടെ അളവ് കണ്ടുപിടിക്കാൻ പുതിയ സെൻസറുകൾ

എൻ.പി. ഹരിദാസ്

കളമറ്റേരി: മരുന്ന്, ഭക്ഷണം, ശീതള പാനീയങ്ങൾ എന്നിവയിലടങ്ങിയിരിക്കുന്ന വിവിധ പദാർത്ഥങ്ങളുടെ അളവ് കണ്ടെത്തുന്നതിനുള്ള സെൻസറുകളുമായി കൊച്ചി സർവകലാശാല. ശീതള പാനീയത്തിലെ രാസമാലിന്യത്തിന്റെ അളവ് മുതൽ ശരീരം ആഗിരണം ചെയ്യുന്ന മരുന്നിന്റെ അളവ് വരെ കണ്ടെത്താൻ ഇതുവഴി കഴിയും.

ഒരു പദാർത്ഥം എത്ര അളവുണ്ടെന്ന് കണ്ടുപിടിക്കാനുള്ള രാസപരമായ രീതിയാണ് കെമിക്കൽ സെൻസറിലൂടെ ചെയ്യുന്നത്. കെമിക്കൽ സെൻസറുകളിൽ തന്നെ ഇലക്ട്രോ കെമിക്കൽ സെൻസറുകളിലാണ് കൊച്ചി സർവകലാശാല പ്രാധാന്യം കൈവന്നിരിക്കുന്നത്. കൊച്ചി ശാസ്ത്ര സാങ്കേതിക സർവ

കലാശാല (കുസാറ്റ്) യിലെ അഡ്വൈസ് കെമിസ്ട്രി പ്രൊഫസർ ഡോ. കെ. ഗിരിഷ് കുമാറിന്റെ നേതൃത്വത്തിൽ 15 പേരുള്ള സംഘമാണ് സെൻസറുകൾ വികസിപ്പിച്ചെടുത്തത്.

കേന്ദ്ര സർക്കാറിന്റെ ഡിഫൻസ് റിസർച്ച് ഓർഗനൈസേഷൻ കേരള സ്റ്റേറ്റ് കമ്മിറ്റി ഓൺ സയൻസ് ടെക്നോളജി ആൻഡ് എൻവയോൺമെന്റ് എന്നിവയുടെ സാമ്പത്തിക സഹായത്തോടെയാണ് സെൻസറുകൾ വികസിപ്പിച്ചെടുത്തത്.

ലോഹങ്ങളുടെയും ഫാർമസ്യൂട്ടിക്കലുകളുടെയും മറ്റും അളവ് നിർണയിക്കാനുള്ള 60-ഓളം സെൻസറുകളാണ് വികസിപ്പിച്ചെടുത്തിട്ടുള്ളത്.

മരുന്ന് കഴിച്ച ഒരു രോഗിയുടെ മൂത്രം പരിശോധിച്ചാൽ ശരീരം ആഗിരണം ചെയ്യാതെ പുറത്തുള്ള മരുന്നിന്റെ

അളവ് ഇത്തരം സെൻസർ ഉപയോഗിച്ച് കണ്ടെത്താനാവും. ഇതുവഴി ശരീരത്തിൽ എത്ര മരുന്ന് ആഗിരണം ചെയ്തിട്ടുണ്ടെന്ന് അറിയാനാകും.

നിലവിലുള്ള സംവിധാനങ്ങൾ ഉപയോഗിച്ച് വിവിധ പദാർത്ഥങ്ങളുടെ അളവ് കണ്ടെത്തുന്നതിനേക്കാൾ വളരെ കുറഞ്ഞ ചെലവിൽ സെൻസറുകൾ ഉപയോഗിച്ച് ഇവ കണ്ടെത്താനാകും.

ഏകദേശം ഒരു കണ്ടെത്തലിന് 5000 രൂപയേ ചെലവാകുകയുള്ളൂവെന്ന് ഡോ. ഗിരിഷ് കുമാർ പറഞ്ഞു.

നിലവിൽ ലോഹങ്ങളുടെ അളവ് കണ്ടെത്തുന്നതിന് ആറ്റമിക് അബ്സോർബ്ഷൻ സ്പെക്ട്രോമീറ്റർ പോലുള്ള ഉപകരണങ്ങൾ ഉപയോഗിച്ചാണ്. ഈ ഉപകരണത്തിന് മാത്രം 20 ലക്ഷത്തോളം വിലയുണ്ട്. ഇതുപയോഗിച്ചുള്ള പരിശോധനയ്ക്ക് വേറെയും ചെലവുകൾ വരും.

പരിശീലനം ലഭിച്ച ആളുകൾക്ക് ലാബിൽ തന്നെ ഉണ്ടാക്കിയെടുക്കാൻ പറ്റുന്നതാണ് ഈ സെൻസറുകൾ.

ചോക്ലേറ്റിൽ എത്രമാത്രം നിക്ക് ഉണ്ടെന്ന് കണ്ടുപിടിക്കാനുള്ള നിക്ക് സെൻസർ, വെള്ളത്തിലെ ഘന ലോഹങ്ങളെ കണ്ടുപിടിക്കുന്നതിനുള്ള സെൻസറുകൾ തുടങ്ങിയവയും ഉണ്ട്.

ഫാർമസ്യൂട്ടിക്കൽ അനാലിസിസിന് രാമിയിൽ വ്യാപകമായി ഉപയോഗിക്കാവുന്ന വിവിധ സെൻസറുകൾ വികസിപ്പിച്ചെടുത്തവയിൽ പെടും. മരുന്നുകളുടെ ഗുണനിലവാരം പരിശോധനയ്ക്ക് രാമിയിൽ ഇത്തരം സെൻസറുകൾ ഉപയോഗിക്കാം.

പലതരത്തിലുള്ള ആൻറി ബയോട്ടിക്കുകൾ, വേദനസംഹാരികൾ തുടങ്ങിയവയുള്ള സെൻസറുകളും വികസിപ്പിച്ചെടുത്തവയിലുണ്ട്.
